## Experience

12/2023 – PRESENT

### Senior Flutter Engineer / Superlist

- Joined the initial savings-account Canadian team as a mobile engineer, where I contributed to creating the mobile app product from scratch.
  - Led three projects and successfully published high-quality applications on both the Apple App Store and Google Play.
  - Collaborated on developing the app's design system and contributed to creating a robust, efficient, and optimized backend architecture for the application.
  - Maintained close collaboration with the UI and QA teams to ensure the application's optimal performance.
  - Standardized the development workflow using Bloc and Git Flow, making the codebase easier to scale and maintain.
  - Ensured codebase stability by writing comprehensive unit and widget tests for over 50 critical functions.
-

06/2021 – 10/2023

## Senior Flutter Engineer / Natrium

- Led a team of application developers, communicating between UI/UX designers and backend developers.
  - Spearheaded the release process of 2 applications, including coordinating with app stores for timely and error-free launches.
  - Conducted 20+ code reviews and facilitated 10+ mentoring sessions, leading to a 30% increase in team code quality.
  - Reduced unauthorized access by 30% with OAuth and Firebase auth.
  - Refactored legacy code to use Bloc state management, resulting in an 18% increase in app performance and code quality.
  - Slashed post-release bugs by 23% by implementing rigorous TDD and automated testing workflows.
  - Engineered continuous integration and deployment (CI/CD) pipelines, reducing deployment errors by 25%.
  - Integrated **WebSocket** (Go backend communication) to replace polling, enabling instant push notifications for transactions and reducing battery usage.
- 

04/2020 – 05/2021

## Mid-level Flutter Developer / Anytime Podcast Player

- Enhanced app performance with Google service integration, resulting in 20% higher user retention and 15% greater user satisfaction.
- Implemented GitHub for version control and team collaboration, achieving a 35% increase in development efficiency.
- Crafted custom push notification solutions, boosting user engagement by 20%.
- Enhanced app for diverse devices, increasing user engagement by 25%.
- Created more than 10 custom widgets and animations to enhance the user experience and app aesthetics.
- Implemented internationalization to cater to 3 language audiences.

04/2019 – 03/2020

## Mid-level Flutter Developer / Alget

- Refactored old code, cutting redundant lines by 10%.
- Shifted to GetX state management and MVC architecture, slashing loading times by 27%.
- Managed app localization and support 2 languages and regions.
- Integrated social sharing and deep linking for user engagement and app growth.
- Improved app functionality and user satisfaction by 25% and 20%, respectively, through the integration of Google Maps and Firebase services.

08/2017 – 03/2019

## Mobile App Developer / Atron

- Co-founded Atron, leading the development of 3 personal applications and 2 client projects.
- Directed the development of 3 proprietary applications and delivered 2 high-priority client projects.
- Improved app accessibility, enhancing inclusivity and making it 30% more user-friendly.
- Initiated, organized, and conducted over 5 meetings to onboard our customers, ensuring their satisfaction and product adoption.
